RE: Approval of the Waste Pit  
Area Stormwater Runoff Control  
Removal Action Project-Work Plan  
Modifications

Dear Mr. Craig:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) revised Waste Pit Area Stormwater Runoff Control Removal Action Project-Work Plan Modifications.

Although U.S. EPA hereby approves the above referenced document, U.S. EPA requests a written update of the ongoing removal action. The update should include: (1) the analytical results for hazardous substance list (HSL) analyses traceable to sample location; (2) figure(s) showing the location of samples; (3) figure(s) showing the areas that have been excavated; and (4) a description of the excess soil stockpile contents. In addition, the report should discuss the location of any samples with elevated levels of HSL constituents encountered during the removal action and the rationale for not segregating excess soils excavated from these areas.

Please contact me at (312/FTS) 886-0992 if you have any questions.

Sincerely,

James A. Saric  
Remedial Project Manager

cc: Graham Mitchell, OEPA-SWDO  
Pat Whitfield, U.S. DOE-HDQ
